Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 18 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by Jung U.S. Patent 6,808,458.

Jung disclosed a machine comprising a seat (2), a drive mechanism (2) that imparts a swing motion to the seat; a moving device (30) that is repeatedly actuated during operation of the drive mechanism.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jung U.S. Patent 6,808,458 in view of Friedson U.S. Patent 6,332,307.

Jung disclosed a machine comprising a seat (2); a drive mechanism (2) that imparts a swinging motion to the seat; the seat has a saddle shape; an elevator (30) provides to adjustability to the height of the seat and repeatedly raised and lowered the seat during operation of the drive mechanism (see column 5, lines 14-51). It is noted that the machine of Jung failed to teach the expandable and contractible member provided on a seating surface of the seat as set forth in claims 1-12 and 19. However,

Art Unit: 3714

Friedson disclosed a saddle assembly comprising an expandable and contractible member in a form of an air bladder (25) (see Fig. 7) providing on each side of the saddle which inherently including positions in oppose the thighs and knees of the user; and a mechanism (26) for expanding and contracting the member (see column 4, lines 64-67 and column 5, lines 1-9). Therefore, it would have been obvious to one of ordinary skill in the art to modify the machine of Jung with the bladders as taught by Friedson for the purpose of providing comfort for the user as well as enhancing the motion of the seat during operation.
